

NEWLIFE® INTENSITY®

Stationary Oxygen Concentrator

HIGH FLOW AND HIGH PRESSURE COMBINED

Combining high flow and high output pressure makes the NewLife Intensity the premier high flow stationary concentrator for at home and facility use.

HIGH-PRESSURE APPLICATIONS

The Intensity has an output pressure of 20 psi (137.9 KPa), more than double any other high flow concentrator.

HIGH FLOW DELIVERY

Offering up to 10 LPM, this time-proven concentrator offers higher flow options to serve the patients in hospitals, long-term care facilities, clinics, waiting rooms, or day and night time settings.

DUAL FLOW OPTION

The unique Dual Flow option features two separate flow meters that can provide a total of 10 LPM — allowing two patients to get oxygen from one machine simultaneously.
